2016

A Letter from the Director

The 2016 LIPI Press Catalogue exhibits our publishing highlights from LIPI's research results in life sciences, social sciences and humanities, earth sciences, engineering sciences, and scientific services.

The 2016 LIPI Press Catalogue calls out the solution, in the form of a splendid array of books that will be crucial to the public conversation on the economy, geology, politic, Indonesian biodiversity, and dozens of other important issues.

Our essential list features some of the best scientific book from remarkable researchers. Under the Surface of Jakarta Threat: Unseen, Unthought, and Unexpected, edited by Robert M. Delinom, reveals the problematic situation of Jakarta's groundwater and land subsidence. Riwanto Tirtosudarmo's On the Politics of Migration: Indonesia and Beyond discusses the phenomenon of migration both from local and global perspectives. Firman Noor, on the other hand, explores the dynamic political relationship between Islamic parties in Disunity and Solidity of Islamic Parties: The Case of PKB and PKS in the First Decade of Reformation Era.

We are delighted to offer a digital edition of our latest titles at www.myperpus.com/catalog/book/lipi_press. For more information, access our website at lipipress.lipi.go.id and penerbit.lipi.go.id. Keep in touch with us by following our Facebook Fan Page (LIPI Press) and Twitter (@lipi_press).

Best regards,

Rahmi Lestari Helmi, Director

The logo for 'Book Catalogue' features the word 'BOOK' in large, bold, white letters. Each letter is filled with a collage of book covers. The 'B' shows a landscape with a reservoir and a map. The 'O' features a sunset and a book cover titled 'ON THE TRAIL OF MIGRATION: INDONESIA'. The 'O' also shows a book cover titled 'POLITICS OF MIGRATION: BEYOND'. The 'K' includes a book cover titled 'ANGKAM: AWAL PERMULAAN TAKART' and another titled 'Cnidariae Catalogue of Angkor Wat'. Below the letters, the word 'Catalogue' is written in a large, orange, sans-serif font.

Jenis Ikan Introduksi dan Invasif Asing di Indonesia

Introduced and Alien Invasive Fish Species in Indonesia

Gema Wahyu Dewantoro and Ike Rachmatika

The existence of introduced fish does not directly give a positive impact toward the ecosystem of Indonesian waters. A serious problem appears and threatens the existence of native Indonesian fish. There is a significant decrease in population of native Indonesian fish. One of the factors that influences this to happen is the lack of control on the spread of introduced fish in Indonesian waters. Recently, it is found that some of those introduced fish have aggressive characteristic and sometimes they also bring a certain disease that is potentially invasive toward native Indonesian fish.

This book gives a lot of knowledge regarding the species of introduced fish, including the biological and morphological characteristics, and also those introduced fish that are invasive potential for the preservation of native Indonesian fish. Besides, this book also discusses the effective management model in decreasing the growth rate of invasive introduced fish in Indonesian waters.

Koleksi Kebun Raya Pucak Tumbuhan Bernilai Ekonomi

Collection of Pucak Botanical Garden: Economic Value Plants

Adi Suprpto et al.

As one of the centers of biggest bio-diversity in the world, Indonesia owns a big variety of plants with its high potential in it. However, ecosystem and forest devastation done by human affects the life and conservation of those potential plants. To maintain its harmony, Plant Conservation Center of LIPI Botanical Garden creates a conservation strategy by building local botanical gardens. One of them is Pucak Botanical Garden. This botanical garden proposes a theme "Agro Botanical Garden" which presents the hidden potency of those economic plants, such as medicinal herbs, food-clothing-and shelter values plants, and those plant processed food.

This book not only discusses about the scientific names, local names, family name, and the synonyms, but also presents the plants morphological characteristics, habitats, usages, and plants breeding. Therefore, it is hoped that this book will be beneficial for the researchers, university students, government, and those who want to learn about those economic plants.

Koleksi Kebun Raya Banua: Tumbuhan Berpotensi Obat

Collection of Banua Botanical Garden: Potential Medicinal Plants

Dodo et al.

Plants not only act as the source of food, clothing and shelter (basic necessities of life) or garden accessories, but also as the source of medicinal herbs which can heal various diseases. The local wisdoms our ancestor told us to use the plants as a pain healer and also medicinal herbs should be preserved, especially in this modern era which put us in the midst of numerous chemical medicines. People start to look back at those medicinal herbs and plantations as the heritage of our ancestor since they provide us traditional medicines without any side effects. The searching for traditional medicinal sources through plants has been done lately to find those medicinal compounds.

Through its theme "Conservation of Potential Medicinal Plants in Kalimantan", Banua Botanical Garden presents its various collection of medicinal plants as the result of forest explorations from different areas in South Kalimantan. Banua Botanical Garden was initiated in 2010 with approximately 100 ha width.

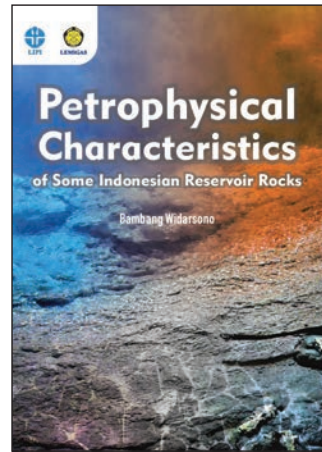

This book provides a brief information of various kinds of plantation in Banua Botanical Garden which are believed to have medicinal qualities, starting from its brief morphological descriptions, spread, habitat, cultivation, and its uses. This book hopefully can give beneficial information about plant-based medicines for the readers.

Petrophysical Characteristics of Some Indonesian Reservoir Rocks

Bambang Widarsono

The need to maintain and improve Indonesia's national oil and gas reserves and production requires support from various sectors of the industry. Apart from the need to discover new reserves, efforts have also to be spent in optimizing and maximizing reserves of the generally mature producing oil and gas fields. In so doing reservoir characterization is an integral part in modeling and planning for field's further developments, production optimization, and any other activities that are aimed at production and reserves improvements. In reservoir characterization, petrophysical properties play a pivotal role in understanding about how reservoirs may react under various production schemes.

Petrophysical properties of reservoir rocks are normally acquisitioned through both direct (laboratory tests and field survey) and indirect methods (geophysical interpretations), of which results of the direct approach are usually taken as sources of comparison and validity. This volume is made up of five published works that present results of studies on petrophysical characteristics of various Indonesia's reservoir rocks derived from laboratory tests. This underlines that all data values were directly measured on rock samples from fields hence emphasizing representativeness and originality of data.

Peran Lembaga Keuangan Perdesaan dalam Pembiayaan Usaha Perikanan Tangkap

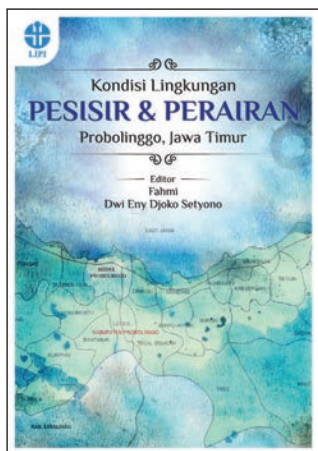

The Role of Rural Finance Institution in Marine Capture Fishery

Mochammad Nadjib (editor)

Indonesia as the biggest archipelagic country in the world should rely on marine fishery as one of its national economic power. However, the local fishermen as the main actors of it still face some financial difficulties. They cannot get the loan from the formal finance institutions as government's partners in improving the fishermen's welfare. Besides, the presence of the loan sharks entangles the fishermen because of its high interest. Therefore, an effective formula as the solution for this classical problem is urgently needed. As a response to this, this book is brought to you.

Kondisi Lingkungan Pesisir dan Perairan Probolinggo, Jawa Timur

Environmental Condition of Coastal and Water Area in Probolinggo, East Java

Fahmi and Dwi Eny Djoko Setyono (editors)

Generally, this edited book discusses the condition of coastal and water area in Probolinggo, including the fertility rate and eutrophication threat, status and projection of heavy metals pollution, bacteriologic condition, invasive macro algae, sediment characteristic, and basic water geomorphology, coastal dynamics, and embankment land status. Information related to environmental status around the coastal area in Probolinggo, including the diversity of water organism and the geographical condition in the coastal area will be very beneficial to improve the economic potential and disaster mitigation as what had happened in Probolinggo.

Perpecahan dan Solidaritas Partai Islam: Kasus PKB dan PKS di Dekade Pertama Reformasi

Disunity and Solidity of Islamic Parties: The Case of PKB and PKS in the First Decade of Reformation Era

Firman Noor

This book reveals the background behind the disunity and solidity of Islamic parties in Indonesia by focusing on two big Islamic parties in Indonesia, Partai Kebangkitan Bangsa (PKB) and Partai Keadilan Sejahtera (PKS). In short, this book explores and analyzes various factors behind the problem of the disunity and solidity in Islamic parties in relation to the institutionalization process of the parties in the first decade of reformation era (1998–2008). This book is ultimately essential for the university students, lecturers, and researchers as it can widen the horizon and understanding about the dynamics of Islamic parties in contemporary Indonesian politics.

Kepiting Uca di Hutan Mangrove Indonesia: Tinjauan Aspek Biologi dan Ekologi untuk Eksplorasi

Uca Crab in Indonesian Mangrove Forests: Biological and Ecological Aspect Analysis for Exploration

Dewi Citra Murniati and Rianta Pertiwi

Mangrove forest is an ecosystem that has an important role for the coastal area preservation. One of the distinctive faunas often found in the mangrove ecosystem is Uca Crab. This book comprehensively covers the systematic, morphological characteristics, and the spread of Uca species. This book is also equipped with an identification key to identify the species in the field. This book is expected to give general information about Uca Crab that is still little known or researched in Indonesia. As a main source of information, it can be used by the researchers to do further research on similar topic.

Persiapan Sektor Pariwisata Indonesia dalam Menghadapi Masyarakat Ekonomi ASEAN 2015

Indonesian Tourism Sector Preparation in Facing ASEAN Economic Community in 2015

Agus Syarip Hidayat (editor)

The establishment of ASEAN Economic Community in 2015 is a major milestone in the regional economic integration. This situation cannot be separated from the tourism sector which is also facing a competitive challenge. The government plays a significant role, especially in making policies regarding the tourism sector. This book tries to portray such phenomenon, while at the same time explains the current situation of Indonesian tourism compared to other ASEAN countries, in term of infrastructure and human resources. This book is hopefully a beneficial reference for the government, public, and other related parties that can contribute to the development of tourism sector in Indonesia.

Knowledge-Intensive Entrepreneurship dan Sistem Inovasi: Studi Kasus Pelaku Industri Telematika di Indonesia

Knowledge-Intensive Entrepreneurship and Innovation System: Case Study of Industrial Actors in Telematics in Indonesia

Hadi Kardoyo et al.

Generally, this book provides an empiric illustration of entrepreneurship activities in innovation system of telematics sector in Indonesia. In addition, this book gives some recommendations and policies that could be implemented to improve the activities of local knowledge-intensive entrepreneurship in the telematics industry in Indonesia. Those recommendations can be implemented through several ways, such as system and banking funding scheme which is accessible to the industrial actors in telematics industry layer 0-1; infrastructure support, coaching programs, training, competition, and promotion; and fair tax policy in favor of the micro/start-up telematics actors/players.

Ancaman Bawah Permukaan Jakarta: Tak Terlihat, Tak Terpikirkan, dan Tak Terduga

Under the Surface of Jakarta Threat: Unseen, Unthought, and Unexpected

Robert M. Delinom (editor)

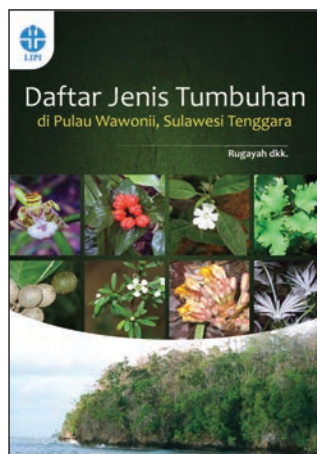

This book explains about the ground water condition under the land of Jakarta and some related things that influence it. Furthermore, this book also tries to introduce the concept of environmental management that is suitable with the current condition and the upcoming possibility in Jakarta. This book is expected to be a suitable reference for those who want to understand the development and the complexity of a big city like Jakarta, in term of spatial management, the preservation of the environment, area development, and the solution to current problems situation.

Daftar Jenis Tumbuhan di Pulau Wawonii, Sulawesi Tenggara

List of Plant Species in Wawonii Island, Southeast Sulawesi

Rugayah et al.

This book describes about the flora-diversity in Wawonii Island which is presented based on the taxonomy groups in the division level and arranged in alphabetical order of its family, genus, and species and is accompanied by its synonym, physical appearances, spreading data, local name, and its herbarium specimen collection and/or ecology proved specimen. This book can be a beneficial source for students and researchers to complete the basic data on flora-diversity in Indonesia. Furthermore, for the local government, it can be used to help them decide the policy on the management and development of Wawonii Island.

Instrumentasi Pendeteksi Kondisi Rel Kereta Api

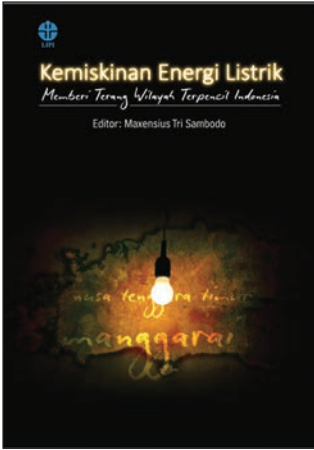

Condition Detector Instrumentation of Train Railways

Daryono Restu Wahono

Train is an effective and a potential massive transportation. However, there is still no adequate equipment or system available to check or detect the damage of the railways. This book explains the instrumentation system used to check the railways condition. This detector functions to give warning and to detect damage or break down conditions in the railway by using the tracking method and GPS, GIS, and GPRS technologies. This book can be used as a reference for the decision makers in train company and technicians in implementing the modern train system so that the safety and performance of transportation can be improved.

Kemiskinan Energi Listrik: Memberi Terang Wilayah Terpencil Indonesia

Electrical Energy Poverty-Lighting the Remotes Areas in Indonesia

Maxensius Tri Sambodo (editor)

This book tries to provide solution for the problem of poverty by giving a detailed explanation on the reality of access difficulty on electrical energy in some remote areas and presenting a scheme in increasing the electrical access which is potential to develop. This book is expected as a reference for the district government for policy making and program planning and for those who involve and care about the problem of electrical access in remote areas. Furthermore, this book is hoped to give information on the knowledge development, specifically on electrical access and poverty.

Ikan Gurami Padang dan Teknik Budidaya Jhonly Pilo

Padangnese Gourami and Jhonly Pilo Cultivation Technique

Livia Rossila Tanjung and Jhonly Pilo

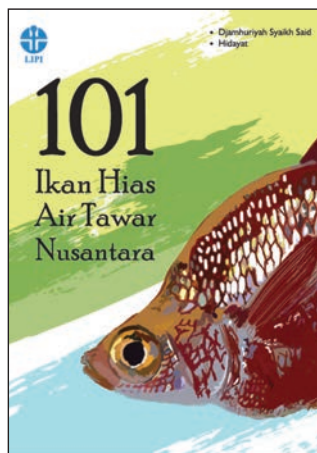

Gourami is one of the main commodities in freshwater fishery. Besides its high domestic demand, exporting this fish for international market is also a promising chance. However, there is only small number of fish farmers and small production of gourami. Jhonly Pilo is a gourami cultivator who found and developed innovative and economical cultivation techniques for gourami. This book gives various innovations for gourami cultivation and is expected to give knowledge for those who have interest in freshwater fishery, specifically in gourami cultivation. Furthermore, the researchers can also use this book as a main reference for their similar researches.

101 Ikan Hias Air Tawar Nusantara

101 Freshwater Fish in Indonesia

Djamhuriyah Syaikh Said and Hidayat

Complete information on 101 species of freshwater fish indigenous to Indonesia, which will be further called Nusantara freshwater fish, can be found in this book. These fish are endemic of freshwater species and among of them are in endangered status. This book provides information on the scientific names, popular names, and also local names if any. It is also equipped with some additional information on the spreading area, the crucial factors of the fish rearing, and the information of reproduction. The beauty of the fish is well presented in the pictures, along with the definition of the habitat, such as river, lake, and reservoir.

Indeks Monsun Asia-Australia dan Aplikasinya

Asia-Australia Monsoon Index and Its Application

Eddy Hermawan

This book tries to provide solution upon climate phenomenon that hampers the agricultural productivity in Indonesia by comprehensively discussing the mechanism of monsoon, the factors affecting monsoon dynamic, and the anomaly impacts of monsoon. The main purpose of this book is to formulate a prediction model of climate dynamic, specifically on rainfall and wind in one form of monsoon index which is suitable for the condition in Indonesia. This book is useful for the policy makers, practitioners, and academicians in predicting the rainfall anomaly that happens in the central area of food agricultural plant productions spread across Indonesia.

Publikasi Ilmiah Peneliti Pusat Penelitian Biologi-LIPI: Abstrak 2010-2014

Researcher's Scientific Publications of Research Center for Biology-LIPI: Abstract 2010-2014

Hari Sutrisno (editor)

Researcher's Scientific Publications of Biology Research Center: Abstract 2010-2014 contains the compilation of research abstracts conducted by the researchers at the Research Center for Biology-LIPI for five years period (2010-2014). The abstracts were compiled from a collection of scientific papers (journals, books, and proceedings) nationally or internationally published. This book is completed with a user guide describing the layout of bibliographic descriptions and indexes that facilitate the reader in finding the desired references. The index consists of the author index, taxon index, and the index of geography followed by a serial number which refers to the order of entry.

On The Politics of Migration: Indonesia and Beyond

Riwanto Tirtosudarmo

On the Politics of Migration: Indonesia and Beyond views migration from its social and political dimension, placing its studies between the realm of demography and politics. The focus is still on Indonesian migration, starting with internal migration and then further beyond its national borders.

This book is a valuable asset for many academics and activists in the area of demography and social-politics, especially those related to migration and refugee. Lawmakers on decentralization and migration will also get the benefit from the information found in this book.

Termometer Inframerah: Teori dan Kalibrasi

Infra-red Thermometer: Theory and Calibration

Hidayat Wiradinata

The basic theory about thermal radiation, blackbody, infra-red thermometer, and uncertainty basic counting are thoroughly explained in this book. Furthermore, this book provides detailed information on calibration technique of infra-red thermometer and the ways of data calibration procession and its uncertainty value. In short, it is expected that this book can be used as a reference for the calibration technician in handling infra-red thermometer calibration in laboratory. Besides, this book is also intended as a suitable reference for those who are interested in learning about infra-red thermometer, such as industrial workers, lecturers, and engineering students.

Pengembangan Mobil Nasional (Bermerek Lokal) di Indonesia: Mungkinkah?

National Car Development (Local Brand) in Indonesia: Is it Possible?

Galuh Syahbana Indraprahasta and Anugerah Yuka Asmara (editors)

There is an assumption that technology used in today's national car is not as good as the one used in preceding cars, such as US cars, Japanese cars, or European cars. Beside technology, it is believed that economic and political factors also play important role in eroding the public's willingness to own national car. This book discusses the suggestions on how to improve the quality of the national car in order to make the national car stands out among other cars made by other countries.

Sumber Daya Laut di Perairan Pesisir Gunungkidul, Yogyakarta

Marine Resources in Coastal Area in Gunungkidul, Yogyakarta

Muswerry Muchtar et al. (editors)

This book contains twelve informative articles explaining about the current condition of natural resources, oceanographic, and geological condition in the coastal area in Gunungkidul. Furthermore, this book also provides information on the mapping of marine resources and oceanographic related to biodiversity conservation of marine life and the stability of marine ecosystem in the area of southern Java. Therefore, this book is useful for researchers and students as a reference for their studies, and for the central and local government as a reference in planning, managing, and developing the coastal areas in Gunungkidul.

De Zeven Provinciën: Ketika Kelasi Indonesia Berontak (1933)

De Zeven Provinciën: Indonesian Sailors' Rebellion (1993)

J.C.H. Blom and Ely Touwen-Bouwsma

This book portrays the situation when economical restlessness and social gap united the Indonesian sailors, consisting of different ethnic groups and religions, to take the same action against the colonialism. The rebellion in De Zeven Provinciën ship was a nationalism spur of Indonesia when the colonial power still strongly existed.

Metrologi Tegangan Listrik: Ketertelusuran dan Implementasi

Voltage Metrology: Traceability and Implementation

R. Hadi Sardjono

Everyone absolutely knows what voltage is. However, how far they know the technical specifications, such as the parameters of accuracy, stability, and effectiveness, is still questionable. This book brings deeper understanding of parameters determining the durability of voltage supplies which are more limited. It then becomes an irony because the need of it is getting bigger. Thus, this book is recommended to be used as a guide to the third latest scale, to be implemented and disseminated, as applied science for the society.

Model Pengurangan Kemiskinan Melalui Penguatan Ketahanan Pangan

Poverty Reduction Model through Reinforcement of Food Security

Purwanto (editor)

Efforts against poverty have always been a goal of Indonesian development. It shows that poverty has been regarded as an important issue that must be solved immediately. However, statistic data and reality in the society show that poverty still becomes a major problem encountered by Indonesia. Thus, poverty reduction model through the reinforcement of food security is urgently required. To answer it, this book comes up with an idea on how to reduce poverty through the reinforcement of food security. The reviews of several programs and development activities in reinforcing food security in order to reduce poverty in rural communities can be found in this book as well.

Penemuan Jenis Baru Lembaga Ilmu Pengetahuan Indonesia Tahun 2010-2014

Indonesian Institute of Science (LIPI)'s New Species Discoveries in 2010-2014

Hari Sutrisno et al.

Indonesia, ranks as the second mega-biodiversity in the world, has various potential hidden natural resources that need to be further explored. This book is LIPI's effort in discovering and revealing the hidden biodiversity in Indonesia. Through five years exploration, 188 new species, including fauna, flora, microbe, and 12 varieties of new plants were found. It is expected that the result of this research can be used for the society welfare.

Orchidaceae Catalogue of Bogor Botanic Gardens

Richa Kusuma Wati and Sofi Mursidawati (editors)

Indonesia hides some of the most beautiful orchids in the worlds. Many people have tried to unravel those orchids and discover their true beauty. During the last few decades, many new species have been discovered, along with the information about their economic values and utilizations. This has made orchids even more popular among many people, as well as researchers.

This book serves as a catalogue that details the most recent information about the Bogor Botanic Gardens' orchids, including the number of genera and species maintained in the collection and their origins. The catalogue provides orchids' identifications, as well as data concerning their distribution as a basis for further study. Close-up photographs of the flowers are also provided as a helpful addition for identification.

This catalogue will be resourceful for orchid enthusiasts, researchers and visitors to the Gardens.

Moths of Gunung Halimun-Salak National Park Part-2: Drepanoidea and Geometroidea

Hari Sutrisno et al.

This book documents the Indonesian bio-resources, especially moths of Drepanoidea and Geometroidea at Gunung Halimun-Salak National Park/Taman Nasional Gunung Halimun Salak (TNGHS). Information on butterflies and moths including 23 Drepanoidea species and 123 Geometroidea species was found here. In addition, inside the book there are a lot of photos of the specimens and locations where the insects were found. It makes the reader easier to understand the contents presented by the book.

Pemanfaatan Teknologi Tepat Guna dalam Penerapan Cleaner Production di Industri Kecil Pengolahan Tahu di Subang dan Sumedang

The Use of Appropriate Technology in Cleaner Production Implementation

Doddy Andy Darmajana et al.

This book presents some benefits of the implementation of cleaner production technology in tofu processing industry, e.g. it can save the clean water usage, increase tofu production rate, decrease the liquid waste, and make use of the solid waste. This book is useful for some related parties, for example the Ministry of Industry, Environmental Impact Management Agency, and people who involve in tofu industry in order to increase the quality of small and medium enterprises of tofu industries.

Teknologi Pengolahan Air Kotor dan Payau Menjadi Air Bersih dan Layak Minum

Technology of Dirty and Brackish Water Treatment into Clean and Ready-to-Drink Water

Perdamean Sebayang et al.

Water is one of the most essential sources of life on earth, however, solution to the problem of water pollution might need an expensive treatment. This book introduces the water treatment technology, specifically on the treatment of dirty, salty, and brackish water which is transformed into clean water and drinking water based on filtration system of water treatment with granular filter media. This technology is equipped with ultrafiltration (UH), reverse osmosis (RO), and ultra violet (UV).

Peluang Adopsi Inovasi Berbasis Data Paten di Bidang Pangan Fungsional

The Opportunity of Patent Data Based-Innovation Adoption in the Field of Functional Food

Diah A. Jatraningrum (editor)

This book views the potency of patent data used as information basis for those who involve in the field of functional food. The patent data can be used to view the research possibility for a product and its priority in order to reach a marketable product innovation, answering the demand and wish of the market and industry. This book is useful for all industrial people in the field of functional food for planning their successful product innovation in the market. The researchers can also use this book as a main reference in exploring the use of the patent data, specifically in the field of functional food.

Peluang Usaha Produk Halal di Pasar Global: Perilaku Produsen dalam Memproduksi Produk Halal

Opportunities of Halal Product Business in Global Market: Producer Behaviour in Producing the Halal Products

Endang Tjitroresmi and Diah Setiari Suhodo (editors)

As the increasing demand of halal products year after year, opportunities of halal product business for Indonesian sellers/producers are still widely open. Indonesia as the biggest Moslem inhabitant country should be able to catch this opportunity, not just importing halal products from non-Moslem countries. Furthermore, 'halal' label is one of important instruments to strengthen the competitiveness of a product in international market. Then, two main questions appearing are how far our local producers respond to the demand is, and how the producers define 'halal' term of a product? Find out the accurate answers inside this book.

Teknik Modern Spektroskopi NMR: Teori dan Aplikasi dalam Elusidasi Struktur Molekul Organik

NMR Spectroscopy Modern Technique: Theory and Application in Elucidation of Organic Molecule Structures

Umar Anggara Jenie et al.

In chemistry world, especially the organic one, the finding of new compound is an advanced and continuous chemistry development. Regarding this aspect, elucidation of chemical compounds becomes a very important activity both for researchers and chemistry students. This book analyses the tricks and applied method of modern technique for Nuclear Magnetic Resonance (NMR) usage. The right use of NMR modern technique will result in a two-dimensional chemical mapping and qualified chemist.

Peta Kebutuhan Kalibrasi bagi Industri di Bagian Barat Indonesia

Necessity Map Calibration for Industry in Western Indonesia

Jimmy Pusaka (editor)

The laboratory calibration services are still rarely provided in local areas. It therefore makes local industries tend to send their inspection equipment to Jabodetabek to be calibrated, with a high cost and risk. Based on those issues, the mapping of calibration services in local areas to decrease the need of calibration outside the provinces is truly important. From this book, such information can be gained.

Pengawasan DPR Era Reformasi: Realitas Penggunaan Hak Interpelasi, Angket dan Menyatakan Pendapat

House of Representatives Monitoring in Reform Era: Reality of Interpellation Right, Questionnaires, and Opinion

Wawan Ichwanuddin and Syamsuddin Haris (editors)

A constitutional change lying down on the spirit of strengthening the presidential system did actually not decrease the intensity of House of Representatives (DPR)'s monitoring political rights. By focusing on the rights of interpellation, inquiry, and statement of views usage from 1999–2011, this book was made based on researches conducted by Research Center for Politics-LIPI in 2011.

Prospek dan Teknologi Budi Daya Beberapa Jenis Sayuran Lokal

Prospect and Technology Cultivation of Various Local Vegetables

Titi Juhaeti et al.

Regarding the fact that the annual rate of vegetable consumption in Indonesia is still far from the vegetable-consuming limit recommended by FAO, this book presents diversification opportunities of Indonesian vegetable community through exploring the less popular local vegetables in our society.

Referring to its content, this book is quite useful for farmers and vegetable cultivars. Researchers and college students are able to use this book in diversifying the sorts of local vegetables, too. Uniquely, this book also tries to give information about the alternative and new edible vegetables aside from vegetables that are commonly sold in the market and consumed by the society.

Pengembangan Industri Energi Alternatif: Studi Kasus Energi Panas Bumi

Industrial Development of Alternative Energy: Case Study of Geothermal Energy

Tuti Ermawati and Siwage Dharma Negara (editors)

Geothermal in Indonesia is potentially developed into new resources in response to today's gradually increasing energy demand. Therefore, the development and investment of this sector must be actively supported by new policies that are able to guarantee the continuation of geothermal industry.

As a response to this case, this edited book presents data and information in term of geothermal aspect and gives new insights about geothermal development's opportunity and challenge in Indonesia.

The Mobility of Unskilled and Undocumented Migrants: Indonesian Workers in The Netherlands

Amin Mudzakkir (editor)

This study analyses the Indonesian workers in the Netherlands. Focused on unskilled and undocumented workers, this study also describes the migration and citizenship policies in the Netherlands. Mix between agency and structural condition at the domestic, regional, and international levels constitute the narrative of Indonesian workers in the Netherlands. The agency is indicated by the formation of Indonesian workers organization in the Netherlands that seeks to obtain the appropriate place in the legal and political structures. The Indonesian Government should look at this phenomenon by increasing its role as a protector of Indonesian citizens abroad.

Prakoso Bhairawa Putera et al.

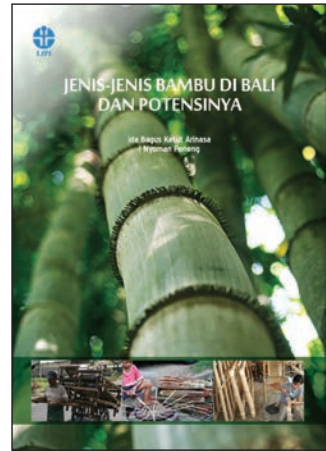

This book portrays the implementation of science and technology and industrial policy in regional level by using East Java and Central Java as its research locuses for the case study of Undang-Undang Sisan P3. This book is useful for science and technology developer in managing the local resource for regional innovation advancement and for the policy makers as a primary source in making regional innovation policy.

Jenis-Jenis Bambu di Bali dan Potensinya

The Species of Bamboo in Bali and Their Potencies

Ida Bagus Ketut Arinasa and I Nyoman Peneng

Bamboo can grow everywhere and is known as a multi-functional plant widely supporting human's daily activities. However, it is not that easy for users, especially the artists, to differentiate the species of bamboos as there are so many bamboos known, around 160 species. In addition, a guide book about Indonesia's bamboos are considered less. As a response to this need, this book is written to introduce some of bamboo species which are popular in Bali and often used by the Balinese to support their activities, together with their habitat, function, and characters based on the use and market information.

Optimalisasi Pemanfaatan Sumber Daya Ekonomi Kelautan: Sistem Pembiayaan Nelayan

The Optimization of Fisheries Economical Resource Utilization: Fisheries Funding System

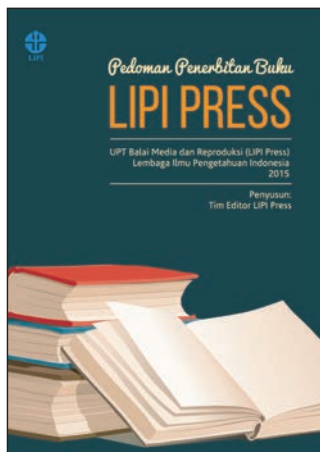

Mochammad Nadjib (editor)

This book analyses the suitable model for fisheries fund which fits our fishermen's characters and cultures. As known, until now informal capital providers have an important role to activate and improve the fishermen's business and economics, yet their access to banking institution is poorly facilitated as it should be. It really is ironic since fisheries subsector is a capital-intensive business.

Regarding those issues, this book also tries to systematically review several alternative solutions of the right and suitable fisheries fund to enhance our fishermen's dignity and to increase their quality of life.

Bahasa, Kebudayaan, & Pandangan tentang Kebahasaan Masyarakat Etnik (Lokal) Kafoa di Alor Nusa Tenggara Timur

Language, Culture, and Views on the Language of Local Ethnic Society Kafoa in Alor, Nusa Tenggara Timur

Abdul Rachman Patji (editor)

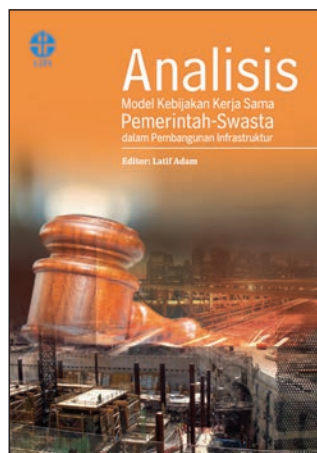

Kafoa is one of the local languages in Alor which is only spoken by a thousand people who live in two villages in South-western Alor district, Nusa Tenggara Timur. However, those people will not use their mother tongue (Kafoa) when communicating with people from other regions. Relating to it, this edited book shows that language preservation cannot be separated from its social, economic, and political aspects.

Analisis Model Kebijakan Kerja Sama Pemerintah-Swasta dalam Pembangunan Infrastruktur

The Analysis of Policy Model of Government-Public Private Partnership in Infrastructure Development

Latif Adam (editor)

A set of questions asking the effectiveness of public private partnership (PPP) implementation in Indonesia still emerges. In response to these issues, this book tries to firstly, identify various problems that might block the program implementation and secondly, gives some recommendations to fix and make them better.

The Cham Diaspora in Southeast Asia: Social Integration and Transnational Networks The Case of Cambodia

Yekti Maunati and Betti Rosita Sari (editors)

The Cham people, particularly following the defeat of the Champa Kingdom by Vietnam in 1693, dispersed into countries like Cambodia,

Malaysia and Thailand, to mention just a few. Therefore, to study their identity is most important as by this we can perhaps understand how minority people struggle to maintain their distinct culture against the mainstream. As a matter of fact, diasporic communities have been

emerging along with the rapid transnational movements witnessed by migrations in Southeast Asia.

Cham people migrated to Cambodia in several stages beginning from the end of the 16th to the early 17th centuries. After the fall of Pol Pot, internal problems in Cambodia encouraged a kind of reverse movement of Cham people from Cambodia to Malaysia since historically, Cham people have

had close connection with people in other countries of Southeast Asia, especially Malaysia and Southern Thailand. Recently, the Arab world has started to be important to the Cham people, especially in relation with religious matters. Transnational networks have been established and these seem to follow old patterns of relationships.

The Islamic world, an important channel for transnational networking, has in turn influenced the contemporary construction of Cham identity.

However, being Cham is not a single identity but fluid and contested. In this, the second year of fieldwork in Cambodia, we came across the so-called Cham Jahed which has a unique practice of Islam. Unlike other Cham who pray five times a day, Cham Jahed pray once a week, on Fridays, and have a different ritual for the wedding ceremony which they regard as the authentic tradition of the Cham because this group considers itself as pure descendants of the Cham in Vietnam, retaining Cham traditions.

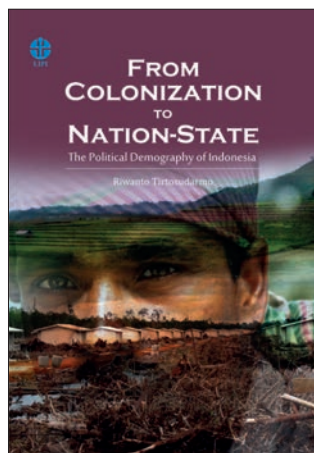

From Colonization to Nation-State: The Political Demography of Indonesia

Riwanto Tirtosudarmo

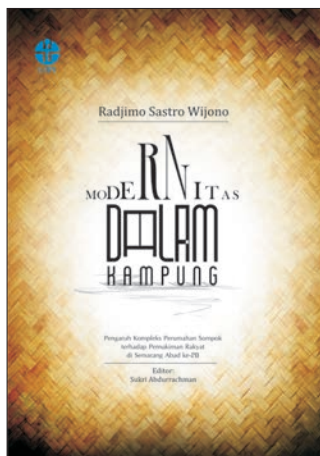

Demography is often perceived as a static equilibrium that has little relevance to social transformation. The conventional perception of demography as a static discipline should be challenged as such view no longer able to explain the increasingly complex social and political realities resulted from the often slow but profound demographic changes.

Indonesia, currently the world's fourth largest country in terms of population size and regionally comprising two thirds of the total population of Southeast Asian countries, constitutes a "sleeping demographic giant" and provides a distinct intricate nexus of demography and politics. Flows and movement of peoples have always been the interest of the state to control anywhere since the ancient time.

The book critically assesses the continuities and changes in the state's demographic engineering practices from the introduction of the Dutch colonial ethical policy at the beginning of the twentieth century until the dawn of the twenty first century following the collapse of the Indonesia's New Order regime in 1998. Several issues that cover in the book include transmigration policy, internal and cross-border mobility, ethnic mobility and the politics of migration.

Pertumbuhan Penduduk dan Kesejahteraan

Population Growth and Welfare

Mita Noveria (editor)

The increase of the population in large numbers gives both positive and negative influences of an area. A large number of residents also give another advantage, namely the huge number of consumer of goods/products consumption. A large number of population demands great social and economic services too. The more the facilities and infrastructure for education need, the more the health care and the food availability are.

Pasar Minggu Tempo Doeloe: Dinamika Sosial Ekonomi Petani Buah 1921-1966

The Past Pasar Minggu: Social-Economic Dynamics of Fruit Farmers 1921-1966)

Asep Suryana

Pasar Minggu was well-known as the main producer of fruit for residents of Jakarta, Indonesia few years ago. This book recalls the lost world of the past Pasar Minggu as fruit-producing area. Using a conjuncture approach, this book historically describes the growth, success, and loss of fruit farming systems in Pasar Minggu. As a historical record, this book is important to understand the lost social-economy world, with all its causes and implications. From this book, relationship between the past suburbs with its rural character and its downtown could be viewed as well.

Komunitas Cina di Medan dalam Lintasan Tiga Kekuasaan 1930-1960

Chinese Community in Medan Across Three Orders 1930-1960

Nasrul Hamdani

Overseas Chinese, spreading away around the world especially in Southeast Asia throughout the history, inevitably has created global problems both for Chinese and their new 'country homes'. Such problems dynamically change following the situation of the era. This book clearly explains such problems in Medan—one of Indonesia's big city well-known with its great number of Chinese—during the three Orders, from 1930 to 1960.

Politik Ekologi: Pengelolaan Taman Nasional Era Otda

Ecology Politics: National Park Management during Regional Autonomy Era

Herman Hidayat, John Haba, and Robert Siburian

This book offers ways of managing national park, the forest resource conservation, in the midst of regional autonomy era. Inevitably, such autonomy creates hot debate of analyzing the park management, between central and local government. However, according to this book, the principal key to overcome such problem is by implementing the collaborative management among current and future stakeholders.

Nasionalisme dan Ketahanan Budaya di Indonesia: Sebuah Tantangan

Nationalism and Cultural Endurance in Indonesia: A Challenge

Thung Ju Lan and M. Azzam Manan (editors)

This book explains that today there is a problem faced by 'nationalism' in Indonesia. The problems are triggered by case of nationalism awakened and cultural endurance. Responding to such problems, this book detailedly explains and offers solutions through political, sociological, and cultural approaches.

Negara di Tengah Kota: Politik Representasi dan Symbolisme Perkotaan (Surabaya 1930-1960)

State in the Middle of a City: Politics of Representation and Symbolism of a City (Surabaya 1930-1960)

Sarkawi B. Husein

This book tries to reveal how and why the symbols of Surabaya City, the second biggest city in Indonesia, changed from time to time along with the dominated authority, specifically in the period of 1930-1960. As a means to represent an authority, symbols of Surabaya City such as monuments, name of street changing, mosque, chinese grave and temple, historical statue, have become an interesting part to discuss because those various symbols explain how a certain city (Surabaya) was directed, run, and controlled.

Mencari Indonesia 2 Batas-Batas Rekayasa Sosial

Searching for Indonesia 2: Boundaries of Social Engineering

Riwanto Tirtosudarmo

Mencari Indonesia 2 Batas-Batas Rekayasa Sosial discusses the social engineering done by Indonesian Government started from the beginning of New Order in Soeharto era. Something discussed and criticized here is the policy making and its impact toward the citizen, especially the citizenship policy using economic and politics approach.

Yo Paramita Abdurachman Perempuan Mendahului Zaman: In Search of Living Traditions and Art

Yo Paramita Abdurachman Era-Preceding Woman: In Search of Living Traditions and Art

Thung Ju Lan et al. (editors)

This book tells about one of Indonesian great women, Yo Paramita Abdurachman, having a lot of contributions and roles for the development of this nation. She had ever translated Indonesian constitutional, Undang-Undang Dasar 1945, into English and also became one of pioneers of the KOWAD (Korps Wanita Angkatan Darat) formation. Besides, her several masterpieces presented in this book reflect Yo's high attention toward old heritage as a living tradition which must be preserved.

Pengembangan Sumber Daya Manusia: di antara Peluang dan Tantangan

Development of Human Resources: between Opportunities and Challenges

Prijono T. and Laila Nagib (editors)

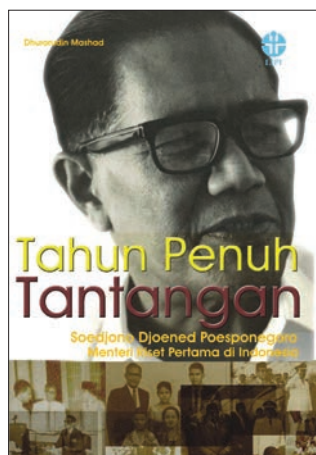

This book reviews the development of human resources—as an actor and a target of an infrastructure building—in a great detail. These ways are not that easy regarding various problems blocking such roles. Yet still, in order to be state-contributing citizen instead of state-burdening actor, these beneficial assets must be effectively managed and assisted to be agents of changes.

Tahun Penuh Tantangan: Soedjono Djoened Poesponegoro, Menteri Riset Pertama di Indonesia

Years Full of Challenges: Soedjono Djoened Poesponegoro, The First Indonesian Minister of Research

Dhurorudin Mashad

This Soedjono's biography tells not only about human interest as other biography books do in general, but also Soedjono's background intellectuality spent most for advancement of science and technology. In this book, Soedjono's thought is deliberately highlighted, and his role as an institutional builder in any places was primarily prioritized. Based on this perspective, the social and political context where and when Soedjono's lived in is also descriptively explained.

Mencari Indonesia: Demografi Politik Pasca-Soeharto

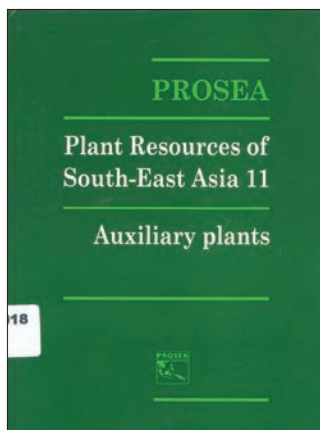

Searching for Indonesia: Political Demography in the Post-Soeharto Era

Riwanto Tirtosudarmo

Book entitled Mencari Indonesia (Demografi Politik Pasca-Soeharto) gives example of anarchy action done by Indonesian people in 1998 when they felt unsatisfied with their leader's work result. Besides, this book comes up with a brilliant idea from the writer to handle those complex problems through mapping the Indonesian demographic condition generally. Moreover, it is likely if this way has almost never been thought by other people, even the country's leader.

Membaca Gerak Alam Semesta: Mengenal Jejak Sang Pencipta

Analyzing the Movement of the Universe: Recognizing the Existence of God

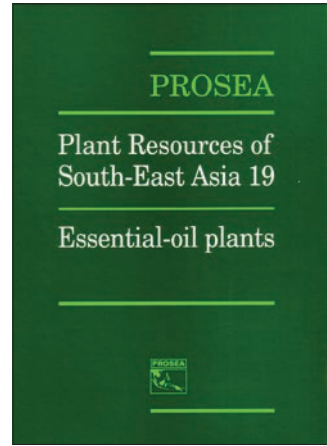

Arie Budiman, Ahmad Jauhar Arief, and Edy Nasriadi Sambas

Ikra, a very concise word but has universal meaning, is a command for intelligent people to analyze every single phenomenon in this wonderful universe. Universe is a simile of book to open, read, understand, comprehend, and appreciate. In this book, the phenomena of sciences are synchronized with norms of life and religious guidance. Therefore, there are two things that could be gained from this book: 1) enriching insight and knowledge; and 2) increasing faith to God.

PROSEA: Plant Resources of South-East Asia 19. Essential oil Plants

L.P.A Oyen and Nguyen Xuan Dung (editors)

This volume deals with the plants of South-East Asia that produce essential oil, particularly the ones producing oil used as fragrance material. A further 31 species of minor importance are treated briefly, while 400 species producing essential oils but having another primary use are listed.
